

JEROLD R. MANDE

I listen, use strong analytic skills and creativity, and define common goals to manage the transformation of large, complex, controversial programs and policies to better lives and improve public health. Working for three presidents and several of the nation's top leaders I led the design of the Nutrition Facts label, investigated and regulated the tobacco industry, and created the system to match organ donors and recipients. Today I am applying new evidence to ensure America's nutrition programs lead to healthier lives, lower health care costs, and strengthen our nation.

PRESENT EMPLOYMENT
